TimeCollect

Precision employee time and data collection software.
The smartest way to shorten your time-to-market

TimeCollect is an employee time and data collection software application that runs on Accu-Time Systems Android-based time clocks. Workforce Management Software companies can use TimeCollect to simplify data collection and tracking. TimeCollect can save months or even years of development time, critical financial resources, and company effort.

TimeCollect lets you seamlessly capture, collect, and transmit necessary employee data at the clock and send it directly to your back-end systems.

To learn more about ATS and TimeCollect, visit www.accu-time.com
or call -1 860.870.5000

Standard features include:

- Easy to use
- Easy to integrate with your back-end system
- Flexible user login options
- Configurable to meet your customers' needs

Configuration Options

TimeCollect can also be configured to provide greater data security and greater control.

- Employees' badge numbers may be displayed or hidden during login.
- Enable or disable punch restrictions. For example: Limiting when someone can punch in or out for meal breaks.
- Configure optional biometric reader for identification or verification mode.
- Enable a variety of optional badge card readers (selected at time of order).
- Main screen customization - Deliver user functionality and language preference for a supervisor and employee.

Configurable punch functionality

TimeCollect can be configured with a multitude of critical data collection options.

- **Punch-In**
  Starts the shift
- **Break Start**
  Pauses the current shift for your break period
- **Meal Start**
  Pauses the current shift for your meal period
- **Manager**
  Requires manager ID or supervisor PIN to access manager's functions.

- **Punch-Out**
  Ends the current shift
- **Break End**
  Resumes the current shift ending the break period
- **Meal End**
  Resumes the current shift ending the meal period
- **Job Transfer**
  Transfers employee from one job role to another
