AccuCloud®

AccuCloud®, ATS' Cloud-based Time Collection Solution for Workforce Management Software Vendors

AccuCloud® is a scalable, enterprise-grade cloud-based employee time collection solution built to seamlessly integrate and work with HCM and ERP applications. It includes durable ATS time collection devices, a cloud-based middleware instance, and a web-based management portal.

AccuCloud provides access to the AccuCloud monitor, to give resellers and their customers direct visibility into their time clock environments, employee punch transactions, connectivity, time clock utilization, and more.

AccuCloud removes logistical and cost barriers and allows WFM software vendors to quickly go to market, improve customer satisfaction, and open new revenue streams. AccuCloud is designed to deliver exceptional customer value, insight, and greater control over your customers' time clock deployments and integration with Workforce Management back-end systems.

AccuCloud® Features

- Time clocks are easy to install and use out-of-the-box.
- Our biometric time clocks prevent buddy punching.
- Time clocks can use barcode, magnetic stripe, and proximity card readers – using your customer's existing badges.
- Supports more than 60 languages.
- Self-monitoring with automatic alerts sent to the ATS Support Team and your IT team.
- Time clock software is configured to fit your business processes.
